To Whom It May Concern:

March 6, 2020

I have known Boyd Ramsey for twenty-five years and gladly recommend him as an expert in the field of geosynthetics. By virtue of his employment at GSE Environmental, Inc. I have observed his expertise in many facets of geosynthetic materials used in geotechnical, environment and transportation related industries.

His interaction with the Geosynthetic Institute (GSI) has been exemplary. Mr. Ramsey was on the GSI Board of Advisors for over ten years and Chairman for two. In this regard, his management skills were profound insofar as working with members and officers of the institute, carrying out its mission to develop and transfer knowledge, assess and critique geosynthetics, and provide services to the member organizations.

I am very impressed with Boyd's achievements within the Geosynthetic Materials Association (GMA). He served as GMA's Chairman from July 2008 to July 2014 and guided the organization to double digit fundraising and membership goals. He also lobbied Congress successfully on Transportation and CCR bills which benefited the geosynthetics community greatly.

Mr. Ramsey is bright, articulate and hard working. His enthusiasm and positive attitude make him a pleasure to work with in any team setting. His communication skills and personal connection to many key stakeholders in the geosynthetic industry make him a valuable asset.

I recommend Mr. Boyd Ramsey for consulting projects dealing with geosynthetics. If you need additional information or have any questions, please contact me immediately.

Respectfully submitted,

George R. Koerner, Ph.D., P.E. & CQA

Director
